QUARTERLY SEMINAR SERIES

ENERGY RESEARCH at DIT

Lubna Mariam, School of Electrical Engineering, **Design and simulation study of a Microgrid system**

Adil Salman, School of Electrical Engineering, **Distributed control for the parallel DC linked modular shunt active power filters under distorted utility voltage condition**

Fintan McLoughlin, School of Civil and Structural Engineering, **Electric vehicle battery re-use in stationary applications**

Aimee Byrne, School of Civil and Structural Engineering, **First steps in the development of cement batteries to store PV energy to power cathodic protection of reinforcement in concrete structures**

Deidre Wolff, School of Civil and Structural Engineering, **Life cycle assessment of electricity production in Ireland**

Ayda Esfandyari, School of Electrical Engineering, **Electric Bike Photovoltaic charging station (PV-CS): Experimental design for electrical fault investigations.**

**September 26th · Seminar Room, Focas Bulding
(behind Kevin St.)**

09:15 - 12:30
